City Returns Show Crider And Ashley Head Candidates

Ashley Heads Field Of Six Candidates In Final Count

Walter Ashley led in the field of six candidates going in office as commissioners from Central, Boca Raton, and West Palm Beach. Crider, ousted inmeshed, and Harold Rabin, becoming commissioner from North Boreham in the city elections held here Tuesday.

Among the North Boreham candidates was the winner, Crider, 200, Sam Berry, 243; and Rabkin, 193. Central Boreham totals were: Ashley 452, Carroll McDonald 176, and Clyde Clayton 67, according to City Clerk Frank Anderson.

A ballot on the city taking over the Country Club of the Everglades showed a slight majority favoring the city dissolving the project. The count was 345 against the proposal and 327 favoring it. There was a margin of only 18 votes.

New commissioners replaced Harold Rabin and Frank Doolay on the council at a meeting Tuesday night in the city hall. Commissioners Junius Harris, N. D. Lloyd, and W. C. Collins are serving out their terms of office.

Lions Honor Earwood By Perfect Attendance

Lions attended the meeting Wednesday a hundred percent in honor of President Henry O. Earwood.

The members failed to reach a positive stand on the United World Federalists' referendum after a discussion of Jim Neeme's speech opposing it and W. V. McPeake's address supporting it.

They decided there is a great need for a better general understanding of the United Nations organization. Special programs and discussions were slated in the future schedule.

\$500 Reward Offered By CATTLE ASSOCIATION FOR RUSTLING CONVICTIONS

Leland Pearce, President of the Palm Beach Cattlemen's Association announced Monday night that the State Attorney had offered a cash reward of \$500 for conviction of any cattle rustlers from members in good standing of the State Association. To belong to this organization you must be a long local and/or county member and that unit must be in good standing with the State group.

Prof. Speer announced that the local group is in good order and the provisions are effective.

Local individual renewals of members and new members announced that the annual convention will be held in Daytona around November 1st.

Shootin' Blanks By Paulette

When beef becomes scarce, bull remains plentiful. Those who doubt the above statement may have been at the Glades Livestock Market sale last Friday where supporting evidence was apparent. A new low of 176 cattle passed through the portals under the gentle melody of the auctioneer master of ceremonies.

But bull was plentiful. Theories on any subject remotely connected with the cattle world were as numerous as beans on a low market. Some gentlemen, I demand, to advise me of the true situation. To buy animals fat, others said to buy them lean.

As always, individuals were present who were wiser than the wisest. They instructed that if one buys the right kind of cattle at the right time and for the right price, he is doing right. The market is a great place for the beginning cow puncher. He can learn more and more about and less and less about almost everything that's worth knowing.

The long hours have been warning us that some day world changes will take place.

(Continued on Page 4)

School Now Running Smoothly, Hobson Says

School is running smoothly now, and registration has been completed, according to Frank O. Hobson, principal.

Final registration totals are: elementary, 397; secondary, 256; for high and high school, 356; entire student body 753, Hobson reports.

The new girls' shower rooms, remodeled this summer, are ready for use. Boys' shower rooms will be built later in the addition for that of the girls.

The boys will now use the platform house, according to Hobson.

This year's school curriculum has enlarged to include art courses here and in the Pahokee schools.

The school board approved the appointment of Mrs. Henry O. Earwood as art instructor. She will conduct two classes here in the afternoons and two in Pahokee in the mornings.

Cattle Market Has Its Lightest Sale

A light run of animals was experienced at the Glades Livestock sale last Friday with a total of 176 cattle, five horses and 18 hogs bringing a total of \$17,665.92, according to the market report.

Sales were:

NATIONAL EDITORIAL
ASSOCIATION

FOR EMPHASIS

Belle Glade is about to begin its active season after emerging from summer dormancy. Part of its population will again delve into the round of activities shared and divided among 15 civic, social, community and fraternal organizations. Group schedules will often be at cross purposes and impede the general program. At least one of this has been the case in the past. The self importance of each group seems to come from the lack of a general community coordinating body.

At the beginning of the summer, the plan was expressed for this organization's planning board. At that time, many of the groups were concluding their meetings and activities for the summer. Now that programs are beginning again and that projects for the year have been outlined, the proposal comes up. This, however, more concrete results might be evidenced.

Occasionally an organization plans an event in conflict with another group. Consequently, neither body has the success and participation which might otherwise result.

If a coordinating body were formed, composed of a member from each organization, a general schedule could be mapped out. Such a body would insure each group open dates for their programs. Also, suggestions for community projects could be pooled for research and selection.

The idea is not a new one. It has been presented twice before. The first time, the originator, John T. Pickett, was complimented on it. Nothing further was done. The last time the idea was brought up, it was not even recognized or condemned.

This time the sponsors are determined to save their plan from an early grave. They plan to follow words with action. They would like the opportunity to speak to local bodies and clubs explaining plans in detail before memberships. They are willing to start the organization rolling.

Merit of working and pulling together for greater results has become an established truth. If an organization is anxious or willing to explore the idea, its leaders should contact John T. Pickett or the Herald.

Lake Shore Elementary School News

By Miss M. C. Edgewcombe

On last Monday evening, the P. T. A. of Lake Shore Elementary was called to order by the president, Mr. E. M. Taylor, presiding. Before starting the new year school's projects, a silent prayer was said to God asking His to guide and direct our work so that it will be a blessing to our boys and girls as they come to drink daily from "The Fountain of Knowledge."

Following into the old business, Mr. Taylor presented Mr. McCurdy who in turn introduced the new teachers, Miss Elease Young and Mr. J. Fitzgerald and the cafeteria helper, Miss Jones to the P. T. A.

We have as our main purpose to bring about a closer relationship among the students, teachers, and parents, so that the school will not be considered as isolated from the community, but one which is a part of the community. (2) To help make our school so refined that our children would be eager to enter its open doors.

Mr. Taylor made a report in regard to the installation of playground equipment for the school in the near future.

Mrs. Ola Caldwell, a member of the American Legion, stated that the organization is sponsoring a Poster contest for the elementary school students. The student who draws the best poster with encouraging words about disabled veterans will be given first prize.

Several committees and committee chairmen were appointed by the president: Program committee, Mrs. Elizabeth Miller; Luncheon program, Mrs. Ross Calhoun; Finance committee, Mrs. Houston; Beau-

understand their students where they could provide to a greater extent for their physical, educational and social welfare.

The enrollments according to grade are as follows: First grade, 52; Second grade, 61; third grade, 51; Fourth grade, 51; Fifth grade, 37; Sixth grade, 26.

We are anticipating approximately double the total number 278 by December. We are expecting a very successful year.

CLUB NEWS

The Arts and Crafts Club of Lake Shore Elem. School met Tuesday Sept. 12, for the purpose of planning for the present school year.

The following officers were elected: President, Mary Byron; Vice president, Gloria Smith; Secretary, Marie Johnson; Trustee, secretary, Connie Clegg; Treasurer, Barbara Eggleton; Chaplain, Diane Singleton.

The members showed much enthusiasm and plan to accomplish much more than the previous year.

Teacher Sponsors: M. J. Adison, C. J. Palms, N. M. Sington, M. C. Edgewcombe.

Everglades Vocational High

316 enthusiastic boys and girls enrolled at E. V. H. on the opening day of school, a great increase over the first day enrollment of last school term. The enrollment is now far in excess of the capacity of the E. V. H. family, registered in their respective classrooms. As usual, the seventh grade class is the largest in the high school, Lake Shore Elem. having a greater number of students.

The members have settled down to work and all classes are meeting as scheduled.

Principal Sayles spoke at the first chapel assembly, which was held Monday at 1:00. He spoke of the duties and responsibilities of each child in protecting school properties, helping maintain clean grounds and applying strict academic rules.

He also welcomed an entire student body of Everglades Vocational High. Also as a part of the chapel exercises, the NHA girls presented a skit which was a very enjoyable lesson.

Principal Sayles spoke at the first chapel assembly, which was held Monday at 1:00. He spoke of the duties and responsibilities of each child in protecting school properties, helping maintain clean grounds and applying strict academic rules.

The Band and Chorus, under the direction of Miss Payne and Mr. Hamilton respectively have gotten off to a big start. Both organizations have increased their members, and all are making plans for a very successful and profitable school year.

The principal and faculty of E. V. H. conducted a very successful pre-school planning period for the three weeks. Principal Sayles welcomed all parents to the new school year.

The following teachers attended various colleges and universities during the summer: Principal Sayles, New York University; Misses Wilson and a daughter of Mrs. Wilson; Mrs. Edith McDonald, Gainesville; Mrs. Mamie T. Shannon, Sarah E. Jones, Elease Young, Lucile Jones, Catherine Palms, and Myrtis C. Edgewcombe.

It is to be hoped that more parents would take an interest in the P. T. A. and make it the best in the state.

NEW CLASSROOMS ADDED

"Learning cannot take place too rapidly in a school where there is no enough space for accommodation," says our author, in that, "ample time cannot be given to individualized instruction."

Since we had an overcrowded condition in our schools last year, the Board of Education has made it possible for the addition of four new classrooms, in order to keep the enrollment of each class at an average. This will enable the teachers to better learn and

LUTHER JONES REALTOR

DR. ROY BAIR, AGRONOMIST (Continued from Page 1) They predicted that the world globe might shift its position and that gravity, the sun and just about everything will start cutting up. Perhaps the first signs of the world's physical appearance are appearing in Belle Glade.

The point of gravity must be shifting here. Several members of the populace can no longer strike a balance on their feet.

Local communities of the revolution have bones which are parted where they used to be joined.

Instead of giving a man (Herman Close) a horse he could not ride, he would saddle him with a devilish stiff gait so the horse couldn't stick together. The result—a broken leg.

Others feeling the shock of such world conditions include Mrs. Luther Jones, L. C. Berry, and Cliff Livingston. To those who shout "come the revolution" I point out these tragic results.

The present "vogue" in these parts is to wear a cast or sling

Registration Time Near For College Students

Students will be leaving this week end next to register at the various executive schools.

Belle Glade students will favor University of Florida with seventeen scheduled to attend Freshmen to go this year are Bill Bailey, Jimmy Herring, Howard Hill, Kay Lutz, Jack Berry, Jerry Conn, Fred Stevens, Jim Buck Layfield, Billy Ray Evans and Geraldine Draa, will enter their sophomore year: Juniors will be Carroll McDonald, Franklin Starling, D. C. Neals and George King, enter their senior year.

Florida State University, Tallahassee, will have ten local students, will have 11 seniors, Dr. Walter Gandy, Dr. George King, enter their senior year. Juniors are Jimmy Ball, three sophomores, Joe Friedheim, Bill Aspey, Charles Miller and Henry Fears, fresh-

men. Larry Royal and Bill McCleatchey will enter their senior year and Shirley Connell and Billee Joe Leathers will enter their sophomore year at Stetson University, Deland.

Anderson University, Southern, Greenville, will be Robert Taylor, Senior; Mary Eleanor Kidder, and Ralph Causseaux, junior and David Kemper.

George Murphy and D. C. Neals enter West Palm Beach Junior College as freshmen. Juniors will enter their sophomore year at the University of Miami.

FOR RENT—Efficiency apartment. Phone 2918. 9-8-11-tf

FOR SALE—One each upright and tank style Hoover vacuum. Bargain. Phone 2530. 9-15-11-tf

FOR RENT—Two bedroom unfurnished house on Avenue B. Phone 2076. 9-15-4-tf

FOR RENT—Furnished dormitory hot water private bath. 225 East Lake Road or Phone 3123. 9-15-11-tf

FOR RENT—Furnished dormitory hot water private bath. Bobo's Inn, Greenville, South Carolina for fresh men a short time ago.

CATTLE MARKET (Continued from Page 1) as to a "short" and a "long" animal. Up to four months come defined as the short period. It was pointed out that six months or longer is normally used in the western raising pens. The forming of fat around the liver is a criterion of the finish on a cow fed animal.

A knowledge of cattle breeding, the more knowledge, the more efficient any operation may become, is the advice of the "knows." You learn to handle the pasture or in the pen if you want to do yourself the most good in buying or selling," says George Young and seconded by Ralph Kidder.

REFRESHMENTS were served by Ralph Kidder and Mrs. Lee Thompson to the 26 members attending.

CRIDER IS ELECTED (Continued from Page 1) proved a levy of 12 mills on taxable property and passed the water department budget on reading.

Accepting the position of chairman of the committee on the operation of the citizens during his term, he invited critics and stated that when the commission is fully organized it will function for the best interest of the city.

The new commission acted on pending city business. Commissioners approved issuance of beer and liquor licenses and issued a resolution from the city planning board submitted by Kenneth Latimer.

Mr. Crider requested that the city acquire the Country Club of the Everglades to be used as a community recreation center.

The new commission acted on pending city business. Commissioners approved issuance of beer and liquor licenses and issued a resolution from the city planning board submitted by Kenneth Latimer.

They elected to the Board of Directors at the meeting were: Thomas Yerger, Roy Vandergrift for the three year terms; J. H. Chamblee and Leland Pearce, two year terms and John L. Evans, Ray Rademacher and E. M. Van Landingham for one year terms.

Roy Vandergrift, President of the Association, presided at the meeting.

Thursday, July 31, 333 individuals had a sold cattle show.

Mr. Roy Vandergrift for the three year terms; J. H. Chamblee and Leland Pearce, two year terms and John L. Evans, Ray Rademacher and E. M. Van Landingham for one year terms.

Mr. Roy Vandergrift, President of the Association, presided at the meeting.

**Greyhound Official
Recommend Fall Season
For Pleasure Trips**

People who take vacation and pleasure trips in autumn are choosing an ideal time of the year for travel, according to T. B. O'Steen, Traffic Manager of Florida Greyhound Lines, who today announced Greyhound's nationwide effort to encourage people to make their travel of Fall as the time for more pleasant highway travel. O'Steen emphasized the many and varied places to go and exciting things to do in the Fall season, such as seeing a big football game, attending social events, visiting the folks back home, going on a hunting or fishing trip, or taking an expense-paid tour to one of the country's wonder spots.

They are just beginning to realize the many distinct advantages of Fall travel," O'Steen pointed out. They are becoming aware of the increased pleasure of such things as cooler weather, for traveling, a much wider choice of food and resort accommodations, the more colorful scenic beauty of the countryside during the Autumn months.

He then went on to say that this Fall Greyhound has made special plans to provide a wide variety of services to make Fall travel. He stated that Greyhound is extending many of its expense-paid America Tours through the Fall months, and that special rates and packages are available for group trips to big games, conventions, club excursions and other group events.

Throughout the Fall season, many types of exciting trips will be arranged and a number of special features offered at rates from \$1. O'Steen emphasized that Greyhound's entire nationwide facilities are being geared to provide the finest possible service for Autumn travelers.

The Experiment Station worker recommended that homeowners have all soiled clothes and other goods cleaned as soon as possible to keep winter insects away. In cleaning, allow maximum flow of air currents, and keep cloth goods as dry as possible. Burning an electric light globe in clothes, taking care to prevent it from coming in contact with cloth or paper, will help reduce humidity and prevent mold growth.

Turning on the heater or stove during a fire in the grate or stove is advisable to dry out clothes. Proper care and development on walls and furniture. Mr. West pointed out, "This practice has been found very effective when done several times during the rainy season and the tropical storm period, when humidity is high." He explained.

"Shoes and other leather goods may be protected from molds by wiping them clean with a dry rag, keeping them dry as possible, and storing them in a cool, dry place. If leather becomes stained or polished with the proper materials for this purpose, he advised against drying leather goods near stoves or other heating equipment, however.

To prevent insect infestation, the Experiment Station worker recommended keeping them under good refrigeration or, in the case of bread and other cereals, storing them in clean dry containers.

Turn and vegetable trade associations of this country are joining in a campaign to urge the national railroads that they provide a minimum of 50,000 new refrigerator cars, according to Lamont Gray, manager of the Florida Fruit and Vegetable Association, in Orlando.

It has been estimated that in the coming season's requirements may appear a shortage in refrigerator cars as great as one-third of the number required. The 50,000 new cars would be of inestimable value to the nation by aiding in efficient distribution of essential fresh fruits and vegetables.

"There has been a proposal that a majority of the Giant Canadian type, while others recommend the new cars be the present standard, all-purpose refrigerator car, with fans.

"In as far as insect pest restrictions on the use of refrigerator cars and demurrage penalties in addition to those in ICC service order number 856.

"FVVA has long been active in working for more adequate transportation facilities. Considerable benefit has accrued to the Florida industry through expediting the return of empties, and locating available cars during shortages, in cooperation with the railroads and other similar services in this field.

"The subject of transportation will occupy a prominent part in our meeting," said the association to be held in Miami Beach on October 4, 5 and 6. Representatives of the railroads and other transportation executives will be present to hear the case for better transportation. It is important to members of the industry that they be well represented, since so much depends on proper representation, said Gray.

In addition to Manager Meekins, other managers attending the meeting were Lamon Williams and D. D. Coleman of the Bonifay Market; J. W. Lamb of the Dade City Market; C. S. Phillips, Manager, Mr. Phillips of the Florida Citrus Market; Mr. W. E. Muller, Manager, and Phil McMullen, Assistant Manager of the Fort Pierce Market; Harry O'Steen of Fort Myers Market; Miss Viva J. Cooke of the Holly Hill Market; Mrs. S. L. Shadwell, Polkton Market; Ira E. Baker of the Polkton Market; R. B. Alvarez of the Plant City Market; J. L. Warren of the Wauchope Market; Frank E. Conner, Manager and R. L. Fisher of the Plant City and E. S. Rydholm of Melbourne.

In fact, Florida and Texas are the only two states with an increase in farm receipts during this period, as compared with the first six months of 1949. All other states reported a decline in farmers' income through June of this year.

From January through June of 1950, the cash receipts to Florida farmers totaled \$283,566,000, or a jump of 11.1 per cent over the same period last year. The total in Texas was \$170,245,000, or an increase of 10.3 per cent than their earnings of a year ago.

"Florida's increased farm income can be largely attributed to the record citrus prices during the 1949-50 season," reports F. W. Parvin, State Agricultural Extension Service economist, "while the increase in Texas' probably is due to a bigger per-acre yield of cotton."

"Protect Our Children Says Chief Kirkman

"Protect our children!" Patrol Chief H. N. Kirkman urged Florida's drivers today as the State Patrol's September program of traffic safety education gained momentum.

"In 1949," Kirkman said, "Our patrols show that 74 children under 15 years of age were killed and nearly 800 were injured in motor vehicle accidents in Florida. Even considering that youngsters habitually take risks, it is evident in their walking, the bulk of the blame for such accidents rests with the drivers."

While most drivers are horrified at the idea of hurting a child, the Florida Highway Patrol nevertheless had a kind of thoughtlessness on the driver's part as the chief cause of the high annual toll of young traffic accident victims.

The Patrol made an urgent appeal to all drivers to heed the following rules:

1. Guard every child in or near the street with the same caution you would a flashing railroad-crossing sign.

2. Expect the unexpected at all times when driving near schools, in residential areas, or in the neighborhood of playgrounds or vacant lots.

3. Give bicycles a wide berth. A child riding may appear to have no physical or perfect control, a stick patch on the street, a chuck-hole, or any of many factors can cause the rider to fall, or lose control and swerve into the path of a car.

4. Particularly in residential areas, the rider should be doubly on the alert for small children playing in driveways or sliding or coasting on inclines that might lead them into the path of a moving vehicle.

The Rafflesia arnoldii flower is said to have the largest blossom of all known flowers. The giant blossom is three feet in diameter and weighs about ten pounds. The plant consists of neither stem nor leaves. It is a parasite.

The U. S. MARINES WANT VOLUNTEERS—JOIN TODAY

The animal conference of Florida State Fair opened Friday, Sept. 8, 7 a.m. to 9 p.m.

The Halls have built a swank resort near their circus ranch at Jensen Beach, known as Langford-Hall Terrace. This is but part of their many enterprises ranging from picnics, personal appearance and recording activities. Joe and Francis have 300 acres of oranges and grapefruit while are located on a yacht harbor and in addition to fishing and boating give guests opportunity to participate in various sports.

In California the Halls own an aviation company at Santa Monica. It is said that Arthur Lake, who plays the part of the famous cartoon character Woodie Woodpecker, is associated with them. Triple deck sandwiches that make them at home for himself. His wife says if she doesn't watch him he does the same trick when he has after dinner guests. It is said that the Allis will go in to keep up with the times if it kills her. Convinced that the modern mode of travel is via air, Miss Alyson has made nine trips cross country via air and has been air sick exactly nine times. Clark Gable is an aviation enthusiast and is rated

as one of the best pilots in the Redskins Rodeo, soon to be released, will return to Florida where he and wife, Franklin Langford, have established a permanent residence.

The fact that managers braved the heat and humidity to attend this morning shows the great interest they have in serving

Florida's varied producers of fresh farm products," Wilson said.

G. M. Morgan, Assistant Director of the State Farmers Markets, presiding with Director Wilson at all sessions directed the round table discussions which included important subjects pertaining to improving marketing services such as advertising, inspection, ice, Methods of Selling, Rules and Regulations, Packing, Delivery, Corn Deal Development, Buyer Problems, Public Relations and others.

W. B. Gilliland, Market Commissioner, discussed the discussion on Advertising and benefits accruing to growers and buyers therefrom.

G. C. Thorpe, Auditor of the Department of Agriculture, spoke on the topic of the guest at the dinner held Friday evening at which M. V. Meekins, Manager of the Palmetto Market acted as Toast Master.

In addition to Manager Meekins, other managers attending the meeting were Lamon Williams and D. D. Coleman of the Bonifay Market; J. W. Lamb of the Dade City Market; C. S. Phillips, Manager, Mr. Phillips of the Florida Citrus Market; Mr. W. E. Muller, Manager, and Phil McMullen, Assistant Manager of the Fort Pierce Market; Harry O'Steen of Fort Myers Market; Miss Viva J. Cooke of the Holly Hill Market; Mrs. S. L. The Patrol made an urgent appeal to all drivers to heed the following rules:

1. Guard every child in or near the street with the same caution you would a flashing railroad-crossing sign.

2. Expect the unexpected at all times when driving near schools, in residential areas, or in the neighborhood of playgrounds or vacant lots.

3. Give bicycles a wide berth. A child riding may appear to have no physical or perfect control, a stick patch on the street, a chuck-hole, or any of many factors can cause the rider to fall, or lose control and swerve into the path of a car.

4. Particularly in residential areas, the rider should be doubly on the alert for small children playing in driveways or sliding or coasting on inclines that might lead them into the path of a moving vehicle.

The Rafflesia arnoldii flower is said to have the largest blossom of all known flowers. The giant blossom is three feet in diameter and weighs about ten pounds. The plant consists of neither stem nor leaves. It is a parasite.

The animal conference of Florida State Fair opened Friday, Sept. 8, 7 a.m. to 9 p.m.

The Halls have built a swank

resort near their circus ranch at Jensen Beach, known as Langford-Hall Terrace. This is but part of their many enter-

prises ranging from picnics, personal appearance and recording activities. Joe and Francis have 300 acres of oranges and grapefruit while are located on a yacht harbor and in addition to fishing and boating give guests opportunity to participate in various sports.

In California the Halls own an aviation company at Santa Monica. It is said that Arthur Lake, who plays the part of the famous cartoon character Woodie Woodpecker, is associated with them. Triple deck sandwiches that make them at home for himself. His wife says if she doesn't watch him he does the same trick when he has after dinner guests. It is said that the Allis will go in to keep up with the times if it kills her. Convinced that the modern mode of travel is via air, Miss Alyson has made nine trips cross country via air and has been air sick exactly nine times. Clark Gable is an aviation enthusiast and is rated

as one of the best pilots in the Redskins Rodeo, soon to be released, will return to Florida where he and wife, Franklin Langford, have established a permanent residence.

The fact that managers braved the heat and humidity to attend this morning shows the great interest they have in serving

Florida's varied producers of fresh farm products," Wilson said.

G. M. Morgan, Assistant Director of the State Farmers Markets, presiding with Director Wilson at all sessions directed the round table discussions which included important subjects pertaining to improving marketing services such as advertising, inspection, ice, Methods of Selling, Rules and Regulations, Packing, Delivery, Corn Deal Development, Buyer Problems, Public Relations and others.

W. B. Gilliland, Market Commissioner, discussed the discussion on Advertising and benefits accruing to growers and buyers therefrom.

G. C. Thorpe, Auditor of the Department of Agriculture, spoke on the topic of the guest at the dinner held Friday evening at which M. V. Meekins, Manager of the Palmetto Market acted as Toast Master.

In addition to Manager Meekins, other managers attending the meeting were Lamon Williams and D. D. Coleman of the Bonifay Market; J. W. Lamb of the Dade City Market; C. S. Phillips, Manager, Mr. Phillips of the Florida Citrus Market; Mr. W. E. Muller, Manager, and Phil McMullen, Assistant Manager of the Fort Pierce Market; Harry O'Steen of Fort Myers Market; Miss Viva J. Cooke of the Holly Hill Market; Mrs. S. L. Shadwell, Polkton Market; Ira E. Baker of the Polkton Market; R. B. Alvarez of the Plant City Market; J. L. Warren of the Wauchope Market; Frank E. Conner, Manager and R. L. Fisher of the Plant City and E. S. Rydholm of Melbourne.

In fact, Florida and Texas are the only two states with an increase in farm receipts during this period, as compared with the first six months of 1949. All other states reported a decline in farmers' income through June of this year.

From January through June of 1950, the cash receipts to Florida farmers totaled \$283,566,000, or a jump of 11.1 per cent over the same period last year. The total in Texas was \$170,245,000, or an increase of 10.3 per cent than their earnings of a year ago.

"Florida's increased farm income can be largely attributed to the record citrus prices during the 1949-50 season," reports F. W. Parvin, State Agricultural Extension Service economist, "while the increase in Texas' probably is due to a bigger per-acre yield of cotton."

The Patrol made an urgent appeal to all drivers to heed the following rules:

1. Guard every child in or near the street with the same caution you would a flashing railroad-crossing sign.

2. Expect the unexpected at all times when driving near schools, in residential areas, or in the neighborhood of playgrounds or vacant lots.

Phone 2676**Colee Sets Up Freedom Crusade Organization**

Following his appointment as State Chairman and Director of the "Freedom Crusade" in Florida by General Lucius D. Clay, last week, Harold Colee began setting up a state organization and named the following Advisory Committee for the state at large:

Hon. George P. Willis, West Palm Beach, Governor; Tallahassee; S. Kendrick Guernsey, Pres., Gulf Life Ins. Co., Jacksonville; Donald K. Carroll, Department Commander, The American Legion; Dick Woodward, Paul H. H. Johnson, Chamber of Commerce, Clearwater; E. Dixie Beggs, Pensacola; Walter L. Hays, Pres., American Chain and Casualty Co., Orlando; E. M. Martin, Pres., Florida Chain Store Council, Tampa; Louis F. Gaher, Pres., Florida Automobile Assn., Orlando; Abe Allenberg, Pres., Florida State Hotel Assn., Miami Beach; A. P. Cooke, Pres., Florida Press Assn., Plant City; Carlisle Rogers, Pres., Florida Bankers Assn., Lakeland; Solon F. Waldo, Atty., Gainesville; Garland Powell, Pres., Florida Association of Broadcasters, Gainesville; David B. Lindsay, Jr., Pres., Associated Dailies of Florida; Frank J. Murphy, Pres., burn Horse, Pres., Florida Federation of Women's Clubs, Madison; A. Y. Milam, Pres., Jacksonville Chamber of Commerce; Hon. Thomas D. Ball, State Sup't. of Public Instruction; W. E. McCall, Pres., Adaline, Pres., Florida Junior Chamber of Commerce, Sanibel; Frank G. Roche, Pres., Florida Federation of Labor, Miami; and Frank W. Norris, Ex-Vice Pres., Bankers National Bank, Jacksonville. Mr. Colee said that Mr. Norris would serve as State Treasurer for the Crusade.

Ten District Chairmen will be named later, Colee said. This "Crusade to Stop Communism" is a national effort to help lift the Iron Curtain and tell the people of the world the truth. General Clay terms it "A Crusade that will be a Spiritual Attack on Communism." The campaign is sponsored by the National Committee for a Free Europe and is endorsed by President Truman.

CATTLEMEN ADVISED TO PLAN FOR FEED FOR WINTER MONTHS

To keep breeding herds in healthy condition during the coming winter, cattlemen were advised by the Florida Agricultural Extension Service to take steps now to provide adequate feed for them.

"Even with our long grazing season, there's a period of 60 to 90 days when cattle need additional feed to keep them in good shape," Dr. Oliver F. Goen, Extension animal husbandman, pointed out. Dr. Goen emphasized that cows in good condition in the fall will carry through the winter much more cheaply than thin, weak ones, and that starving cows produce small amounts of milk and weak calves. He also explained that it is easier to maintain cows in good weight in winter than to make them gain back weight lost because of inadequate feed.

Winter feed may include regular grain, temporary grass crops, sun-cure haylage, or legume hay. A limited amount of protein-rich concentrate feed, such as cottonseed meal, fed to cattle on grass or citrus or cane molasses will give good results.

Dr. Goen also made these recommendations:

Temporary pastures of oats and rye provide grazing for breeding animals and young stock. Wintering cattle on pastures with hay and other roughages. Begin planting oats and rye in late September, applying about 300 pounds of 4-10-7 or 4-7-7 fertilizer per acre for good growth.

Reserve a portion of pasture—keeping stock off it for two or three weeks—will provide grazing that will enable cows to enter the winter in good condition.

Feeding hay, Alyce clover hay, and other home-produced hay are good winter feed.

Over-stocking pasture results in cattle going into the winter in a thin, unhealthy condition. This practice should be avoided.

Dr. Goen also advised cattlemen to plan now for supplies of protein concentrates and minerals they will need during the winter.

USING CITRUS

Florida's delicious citrus can be used to tempt the appetites of the family, and home-makers are daily discovering new ways in which it may be put in the menu. It is used in combination salads, ambrosia and a large number

of other desserts, in pastries and cakes, and in many many other ways. Try tangy orange juice as the liquid for your pie crust and get fresh ones who eat it. And don't forget the biscuits bound to bring the folks back for "seconds" and "thirds". It is Orange Biscuits.

First, make the orange paste filling. You'll need 6 tablespoons of sugar, 2 cups of flour, one-third cup orange juice, a grated rind of medium orange, and 1 cup of sugar. Cook together all ingredients except sugar until thick. Then add sugar and remove from fire. Let paste cool before using.

With the paste ready, make a biscuit dough by your favorite recipe. Roll half and inch thick and cut in strips six inches wide. Spread orange paste on strips, roll like a jelly roll and, with a sharp knife, cut in one-inch slices. Place in a baking sheet and bake in a hot oven.

DR. PIPES

(Continued from Page 1) able; take cover if it is a step away, or if in the open, drop to the ground and curl up.

The explosion takes place in a fraction of a second and exerts its damage in three principle ways:

1. By heat in the neighborhood of one million degrees, which lasts for about three seconds.

2. Direct shock waves, which last about 10 seconds.

3. Gamma waves, which last about 100 seconds.

The Gamma waves are similar to X-rays, and cause the so-called radiation sickness. The prominent feature of this disease is temporary or permanent damage to the bone marrow. The bone marrow, among other things, produces the red and white blood cells in the blood stream. As a result of the damage to the bone marrow, the number of white and red cells decrease rapidly in the blood stream. The main function of white blood cells is to protect the body from infection. We live in an atmosphere loaded with germs. The air we breath, the food we eat, and the utensils from which we eat are covered with bacteria.

The reason under normal conditions that we aren't sick as many other ways. Try tangy orange juice as the liquid for your pie crust and get fresh ones who eat it. And don't forget the biscuits bound to bring the folks back for "seconds" and "thirds". It is Orange Biscuits.

First, make the orange paste filling. You'll need 6 tablespoons of sugar, 2 cups of flour, one-third cup orange juice, a grated rind of medium orange, and 1 cup of sugar. Cook together all ingredients except sugar until thick. Then add sugar and remove from fire. Let paste cool before using.

With the paste ready, make a biscuit dough by your favorite recipe. Roll half and inch thick and cut in strips six inches wide. Spread orange paste on strips, roll like a jelly roll and, with a sharp knife, cut in one-inch slices. Place in a baking sheet and bake in a hot oven.

In an air blast there will be very little residual radiation and it will be possible to use buildings and standing very soon after an explosion.

An underwater blast is less destructive immediately, but is followed by a cloud of spray and fog which will cover the area for a variable period af-

terwards. This will make all objects which come in contact, radioactive for some time. All persons exposed to this fog should discard their clothes and bury them in the ground. They should wash themselves well with soap and water. Washes should be improved by scrubbing with soap and water, but sand blasting seems to be the only completely safe method.

Therefore, it would seem

that the biggest jobs in a medical casualty station will be:

1. The giving of blood transfusions. 2. Treating burns. 3. Analyzing blood in patients to determine the number of white cells in the blood, since a fall in the white cell count means that the person has an infection sickness and that transfusions must be started at once.

An underwater blast is less destructive immediately, but is followed by a cloud of spray and fog which will cover the area for a variable period after an explosion.

In an air blast there will be very little residual radiation and it will be possible to use buildings and standing very soon after an explosion.

RESEARCH HAS BEEN OF TREMENDOUS VALUE TO FLORIDA AGRICULTURE

Less than one percent of Florida's annual gross farm income is spent on agricultural research. The results that Florida farmers have received from this comparatively small investment are astounding.

Looking back over the past two decades, most citrus growers can remember the serious condition of the crop during the early Thirties. At that time many people were speculating as to how much longer the industry would last. Thanks, however, to research by the University of Florida Agricultural Experiment Stations, major element deficiencies were found to be causing the sick conditions of citrus trees. Growers were advised to add more manganese, boron and zinc to their fertilizers, and the disease symptoms disappeared. The trees returned to normal, and yields began to climb and to be high every year, instead of only in alternate years as previously.

LEGAL NOTICES

NOTICE IS HEREBY GIVEN THAT I, B. A. STATE, Secretary of State do hereby give

GENERAL ELECTION

County of PALM BEACH

Tuesday next succeeding the First Monday in November, 1950, at the

Two Railroad and a Public
